Destination Value Total Return Fund

Summary of Characteristics and Potential Benefits

Source: Plenisfer. For illustrative purposes only. The objective of this Sub-fund is to achieve a superior risk-adjusted total return over the market cycle. However, there is no guarantee that the investment objective will be achieved or that any return on capital will be realised. The Fund is not a capital-protected product: all investments involve risks, and investors may not recover the whole of their initial investment. Investments may result in financial loss, as no capital protection is in place. Investors should carefully read the Prospectus and the KID before making any final investment decision. These documents are available at www.plenisfer.com, at the registered office and from authorised distributors, also in paper form. Full information on risks is available in the Prospectus and the KID.

1. A percentage of the value of your investment per year, consisting of up to 0.75% and up to 1.75% for share classes I and S, respectively, as annual management fees. This is an estimate based on actual costs over the last year.
2. A percentage of the amount paid upon subscription, calculated on the Net Asset Value (NAV).
3. No exit fee is charged for this product; however, the distributor or seller may apply one.
4. A percentage of the value of your investment represents an estimate of the costs incurred when buying and selling the underlying investments.
5. The performance fee is calculated according to the "High Water Mark with performance fee benchmark" mechanism, with a 15.00% annual rate applied to the positive return above the "SOFR Index" (the performance fee benchmark). The actual amount will vary depending on the investment performance. Tax aspects depend on each investor's individual circumstances and may change over time. Please consult your financial and tax advisors for more details. To verify the availability of share classes in your country of distribution, please refer to the management company's website.

Source: Plenisfer. Based on the latest KID – 31 July 2025. The Fund is not a capital-protected product: all investments involve risks and investors may not recover their initial investment. Past performance is not a reliable indicator of future results. Returns may increase or decrease due to market conditions and currency fluctuations. Please refer to the Prospectus and the KID for full information on risks. Portfolio allocation may vary in line with the Fund Prospectus.

SFDR classification: The Sub-fund promotes environmental or social characteristics as per Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR"). It does not have sustainable investments as its objective.

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Sub-fund consist of excluding sectors which are deemed harmful to society by the Investment Manager, while considering various ESG information, as further described below. In addition, the Investment Manager applies a targeted engagement and voting process to the equity bucket and, to a limited extent, to the fixed income asset classes. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

Binding elements: the following exclusion criteria apply to the Sub-fund: Direct involvement in from controversial weapons (cluster munitions, anti-personnel mines and/or biological/chemical weapons), Violation of the Treaty on the Non-Proliferation of Nuclear Weapons, 10% or more of turnover is derived from pornography, 20% or more of turnover or energy produced is derived from coal or 20% or more of turnover is derived from tobacco. Moreover, the Sub-fund has a targeted approach that involves the selection of companies on which to focus engagement activities and the possibility of influencing decisions in relation to the voting shares held or the share held in the bond issue.

Limitations to methodologies and data: Although various sources are used to ensure that environmental and social characteristics are applied for the Sub-fund, there are limitations to the methodologies and data sources. The data is based on public sources and information bias exists. For example, larger companies are subject to more transparency requirements than smaller companies. In addition, the possibility exists that relevant information for the Sub-fund's investments are not publicly available. Some, but not necessarily all, limitations in performing sustainability and ESG analysis are as follows: • The availability of data, particularly for emerging companies and markets. The consistency and / or comparability of data as not all companies publish the same indicators. • The quality of data and the lack of universal standards related to third party verification, if any. • The use of external providers can introduce bias resulting from the providers' proprietary methodologies. The Investment Manager will evaluate the data quality and availability and monitor alternative sources for any missing data,

Before making any investment decision, please consider all the objectives, characteristics, binding elements of the selection process and methodological limits contained in the Prospectus, the SFDR Pre-contractual Annex, as well as the Summary of the website Product disclosure available at this [link](#).
